SAFETY WARNINGS

FUEL AND PRE-OPERATION

- Avoid spilling fuel when mixing oil.
- Do not smoke while fueling the power unit.
- Fuel the power unit in a well-ventilated area.
- Move away from the fueling area when starting the unit.
- Inspect the area before starting the unit. Remove all debris and hard and sharp objects.
- Carefully read and understand the operator's manual of the unit that powers this attachment.

DURING OPERATION

- Dress properly. Avoid wearing clothing with loose strings, chains, ties, etc.
- Keep the air intake opening clear of debris.
- Keep clothing and body parts away from the engine exhaust outlet.
- Wear safety goggles or glasses when using the unit. They provide protection against flying objects and dust.
- Wear a dust mask if use will create a dust laden environment.
- Do not smoke while operating the unit.
- Use the unit only in a well-ventilated area.
- Turn off the engine and let it cool before refueling or before putting the unit in storage.
- Never attempt to clear a clogged vacuum tube with the engine running.
- Do not point the vacuum in anyone's direction or in the direction of windows. Occasionally objects are hit by the vacuum impeller and are ejected at high speed.

- Never operate the unit without the vacuum tube or bag installed.
- Avoid situations that could catch the collection bag on fire. Do not operate near an open flame. Do not vacuum warm ash from fireplaces, barbecue pits, brush piles, discarded cigars or cigarettes unless cinders are completely cool.
- Do not wear rubber or other insulated gloves when using the unit to avoid static electricity shock.
- Never operate the unit with a damaged bag. Bags will deteriorate during use. Check the bag for damage and replace when necessary. A damaged bag may let objects pass through, causing injury.
- Always make sure the bag is completely zipped prior to starting the unit.
- After striking a foreign object, stop the engine and inspect the vacuum for damage, and repair it before restarting.
- Keep bystanders and pets at least 10 m (30 feet) away.
- Look behind and use care when backing up.
- Never operate without good visibility or light.
- Exercise caution to avoid slipping or falling.

AFTER OPERATION

- Store the unit in an area free of potential fuel vapor ignition sources such as open flames or electrical sparking devices.
- Allow the unit to cool before putting it into storage.
- Only qualified personnel should perform any repairs or maintenance procedures that are not described in this manual.

ASSEMBLY INSTRUCTIONS

1. Install the clamp onto the vacuum tube (Fig. 1).
2. Install the tube. Tighten the clamp (Fig. 1).
3. Install the bag elbow and tighten the wing nut (Fig. 2).
4. Fasten the strap to the shaft above the handle (Fig. 3).

SPLIT-BOOM ASSEMBLY

1. Loosen the wing screws of the Split-Boom coupler. This will allow the lower (attachment) boom to be inserted into the coupler (Fig. 4).
2. Remove the protective cover from the lower boom. Push the lower boom into the coupler (Fig. 5).
3. Locate and lock the release button into the hole in the coupler (Fig. 6). Check the sight hole to make sure both ends of the boom are together before using the unit.
4. To remove the attachment, loosen the wing screws, push the release button and pull the lower boom straight out of the coupler (Fig. 6).

OPERATING INSTRUCTIONS

1. The vacuum can be used for cleaning around rocks (Fig. 7), under shrubs and trees (Fig. 8) and along walls (Fig. 9).
2. Shake the bag vigorously while emptying it to remove the dust (Fig. 10).

MAINTENANCE INSTRUCTIONS

1. Oil the impeller bushings every 10 hours of operation. To oil, remove the screw and add 5 drops of 30 weight engine oil. Reinstall the screw (Fig. 11).

SPECIFICATIONS

Operating Weight:
6.6 kg (14 lbs. complete unit)

Bag Capacity:
.0728 m³ (2 Bushels)
